Office Action Summary	Application No. 10/657,706	Applicant(s) BITTON ET AL. 67	
	Examiner Mark Rosenbaum	Art Unit 3725	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-37 are rejected under 35 U.S.C. 103(a) as being unpatentable over the Japanese publication (Japan). This publication discloses the basic concept of shredding scrap aluminum articles into smaller fractions and shot blasting the fractions to produce a desired product for recycling purposes. Any remaining limitations would then have been obvious design choices by one skilled in the art for various reasons. For example, applicant's specification states on page 7 that the magnetic separation step may be dropped if the initial material is largely free of contaminants i.e. the use of a magnetic separation step would have been obvious if so needed. The remaining separation steps claimed i.e. claims 2,3,8,18,19,21,25,26 and 30 would also have been obvious if so needed. Also, collecting the cleaned parts for a particular manufacturing process i.e. claims 5,6,7,9,10,11,20,22,27,28,29,31,32,33 does not further limit the method of producing aluminum for recycling. Finally, the particular aluminum alloy treated would have been obvious based on several factors such as the material needed for recycling purposes.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
